

Single Sign-On: The Architecture of Access

Modernizing Identity Management

The Fragmented Identity

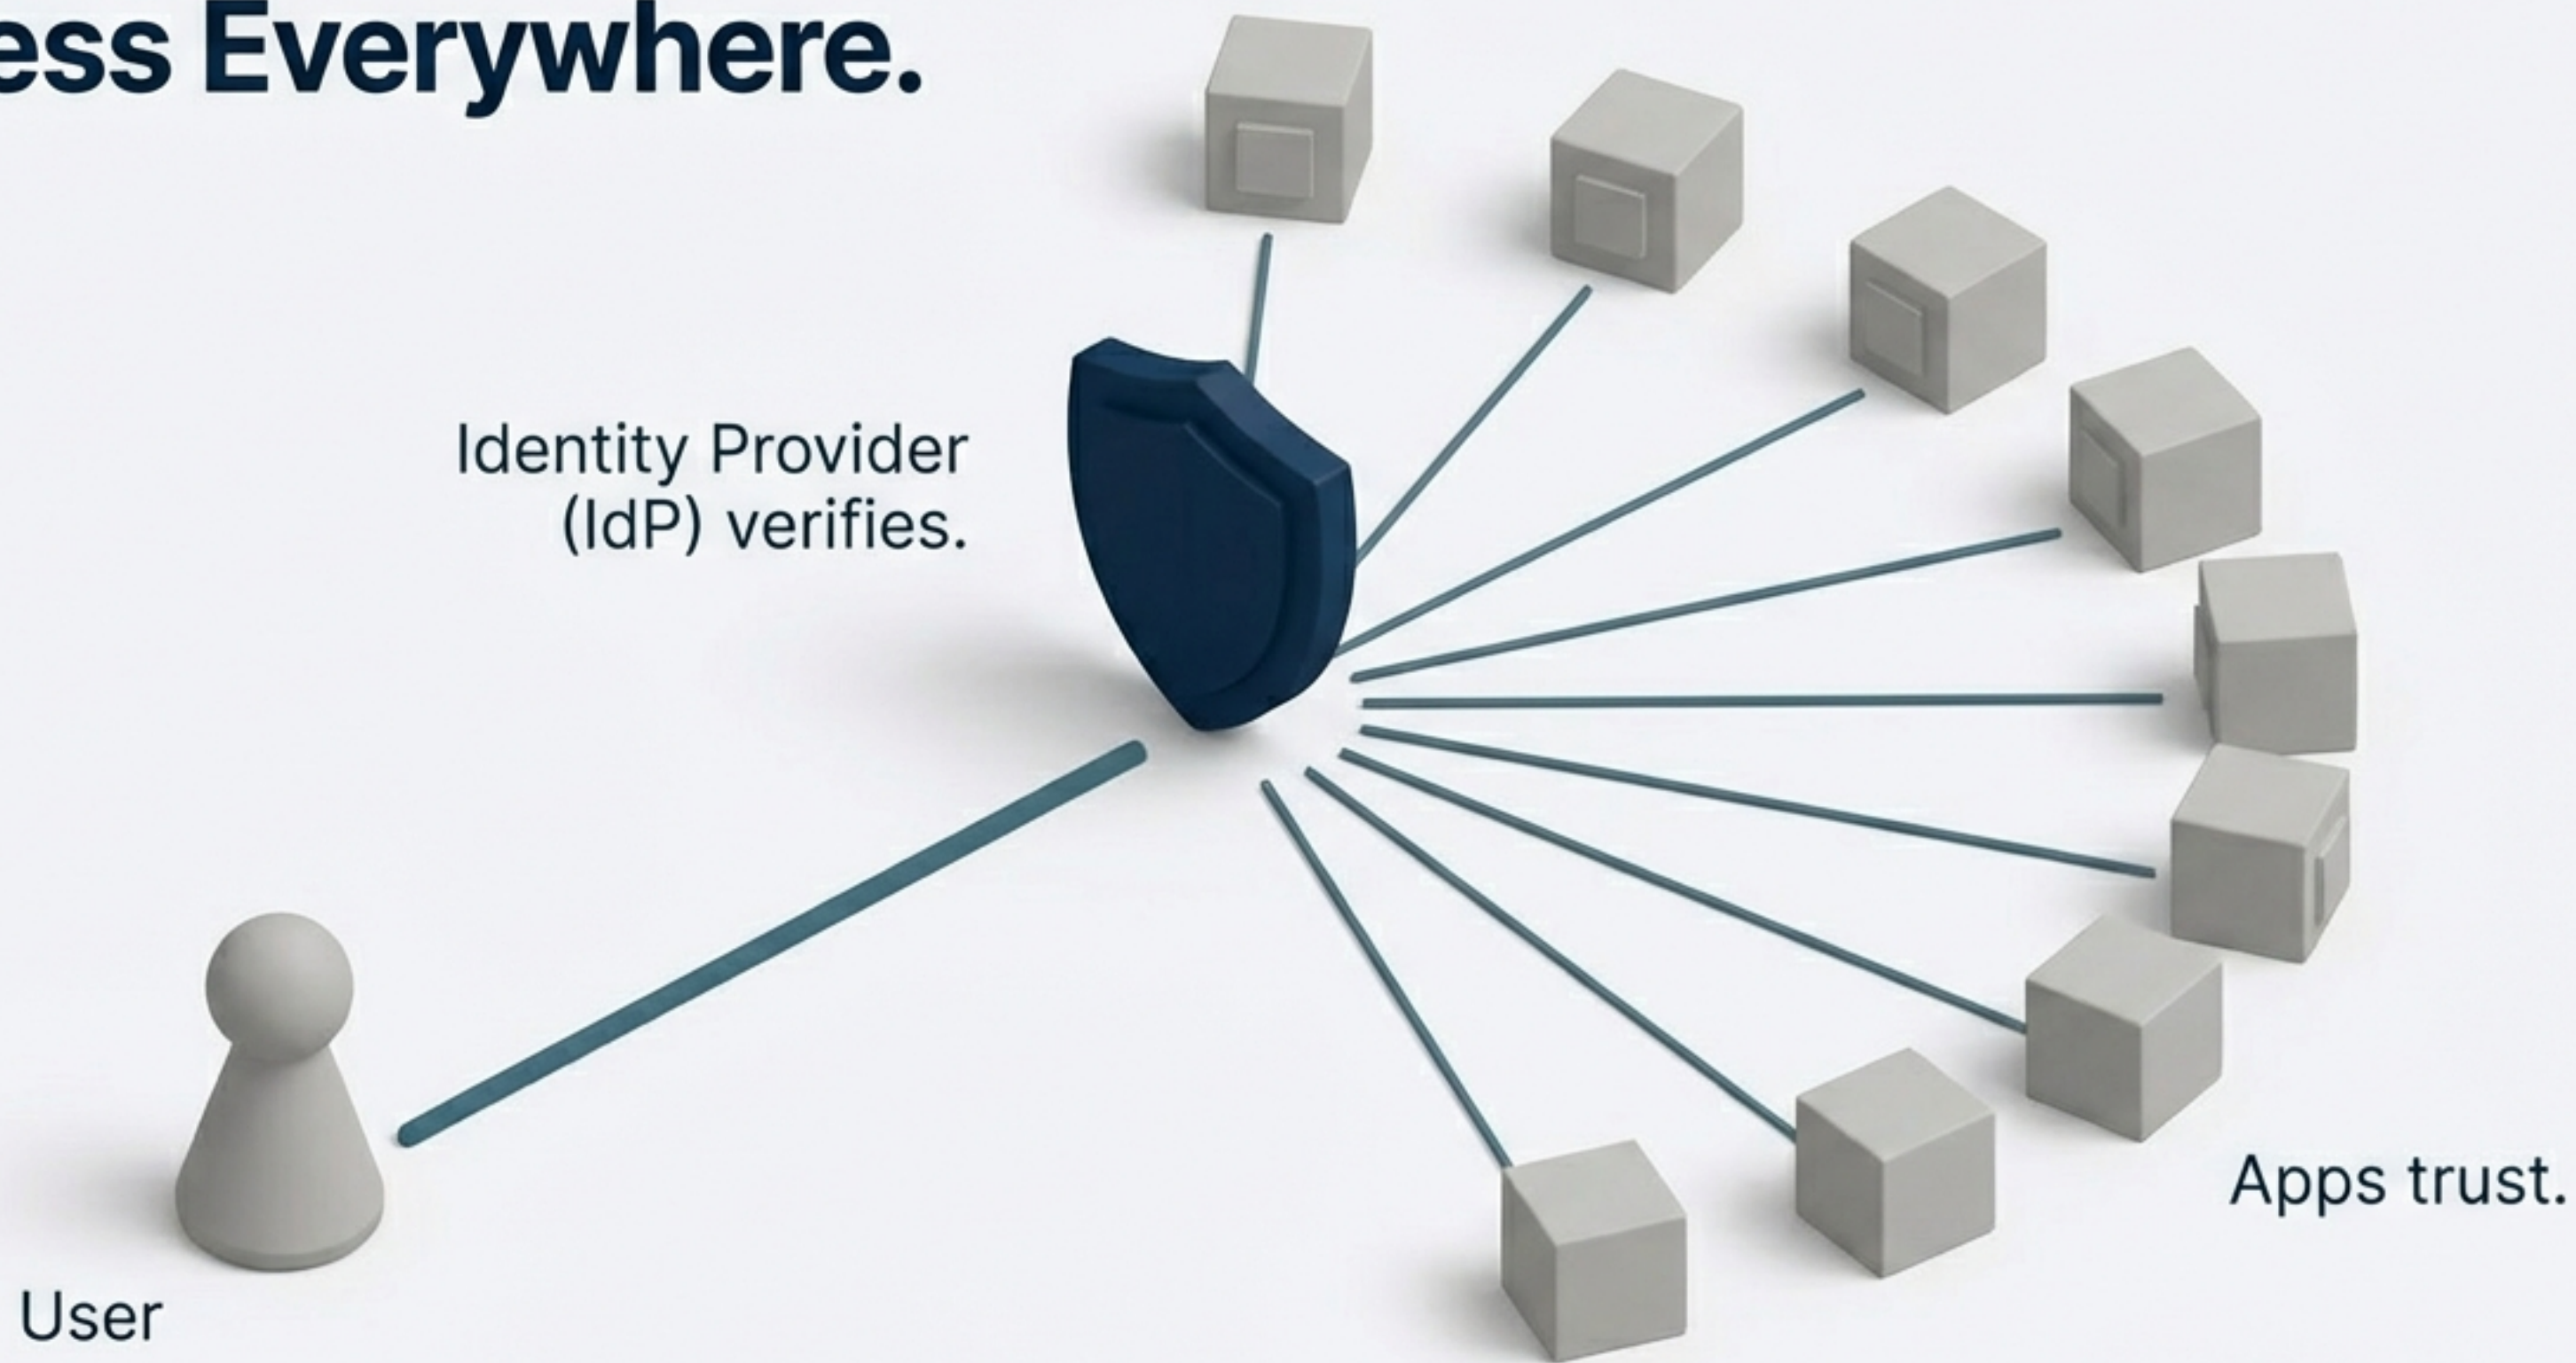

Decentralization:
Disconnected
passwords and
sessions.

Sync Nightmare:
Manual user pool
synchronization.

Security Debt:
Increased surface
area for attack.

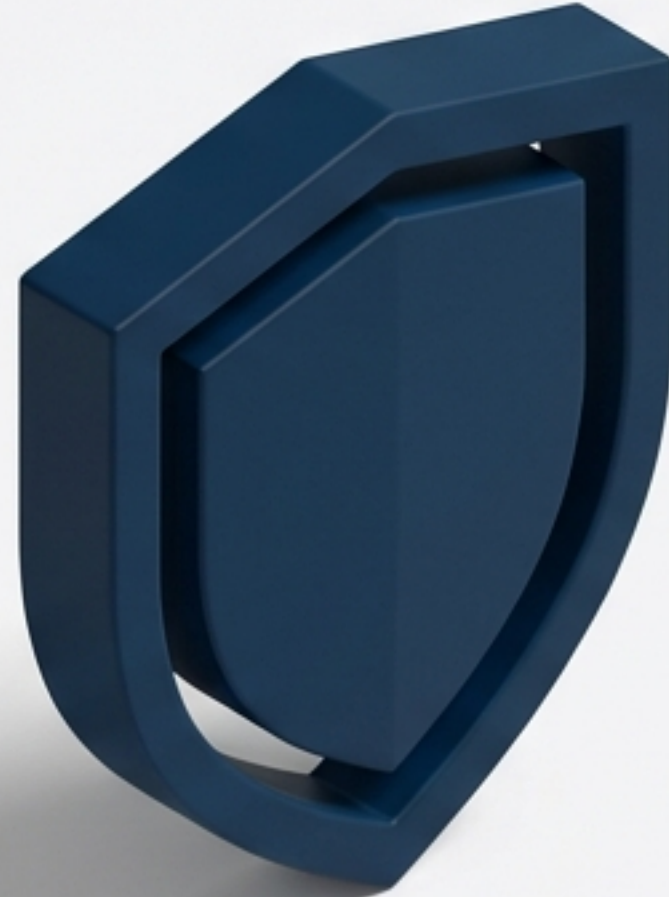

Authenticate Once. Access Everywhere.

The Ecosystem

User
(The Request)

IdP
(The Authority)
e.g., Azure Entra ID / B2C

App
(The Service)

The Token Economy

ID Token

Access Token

The Passport

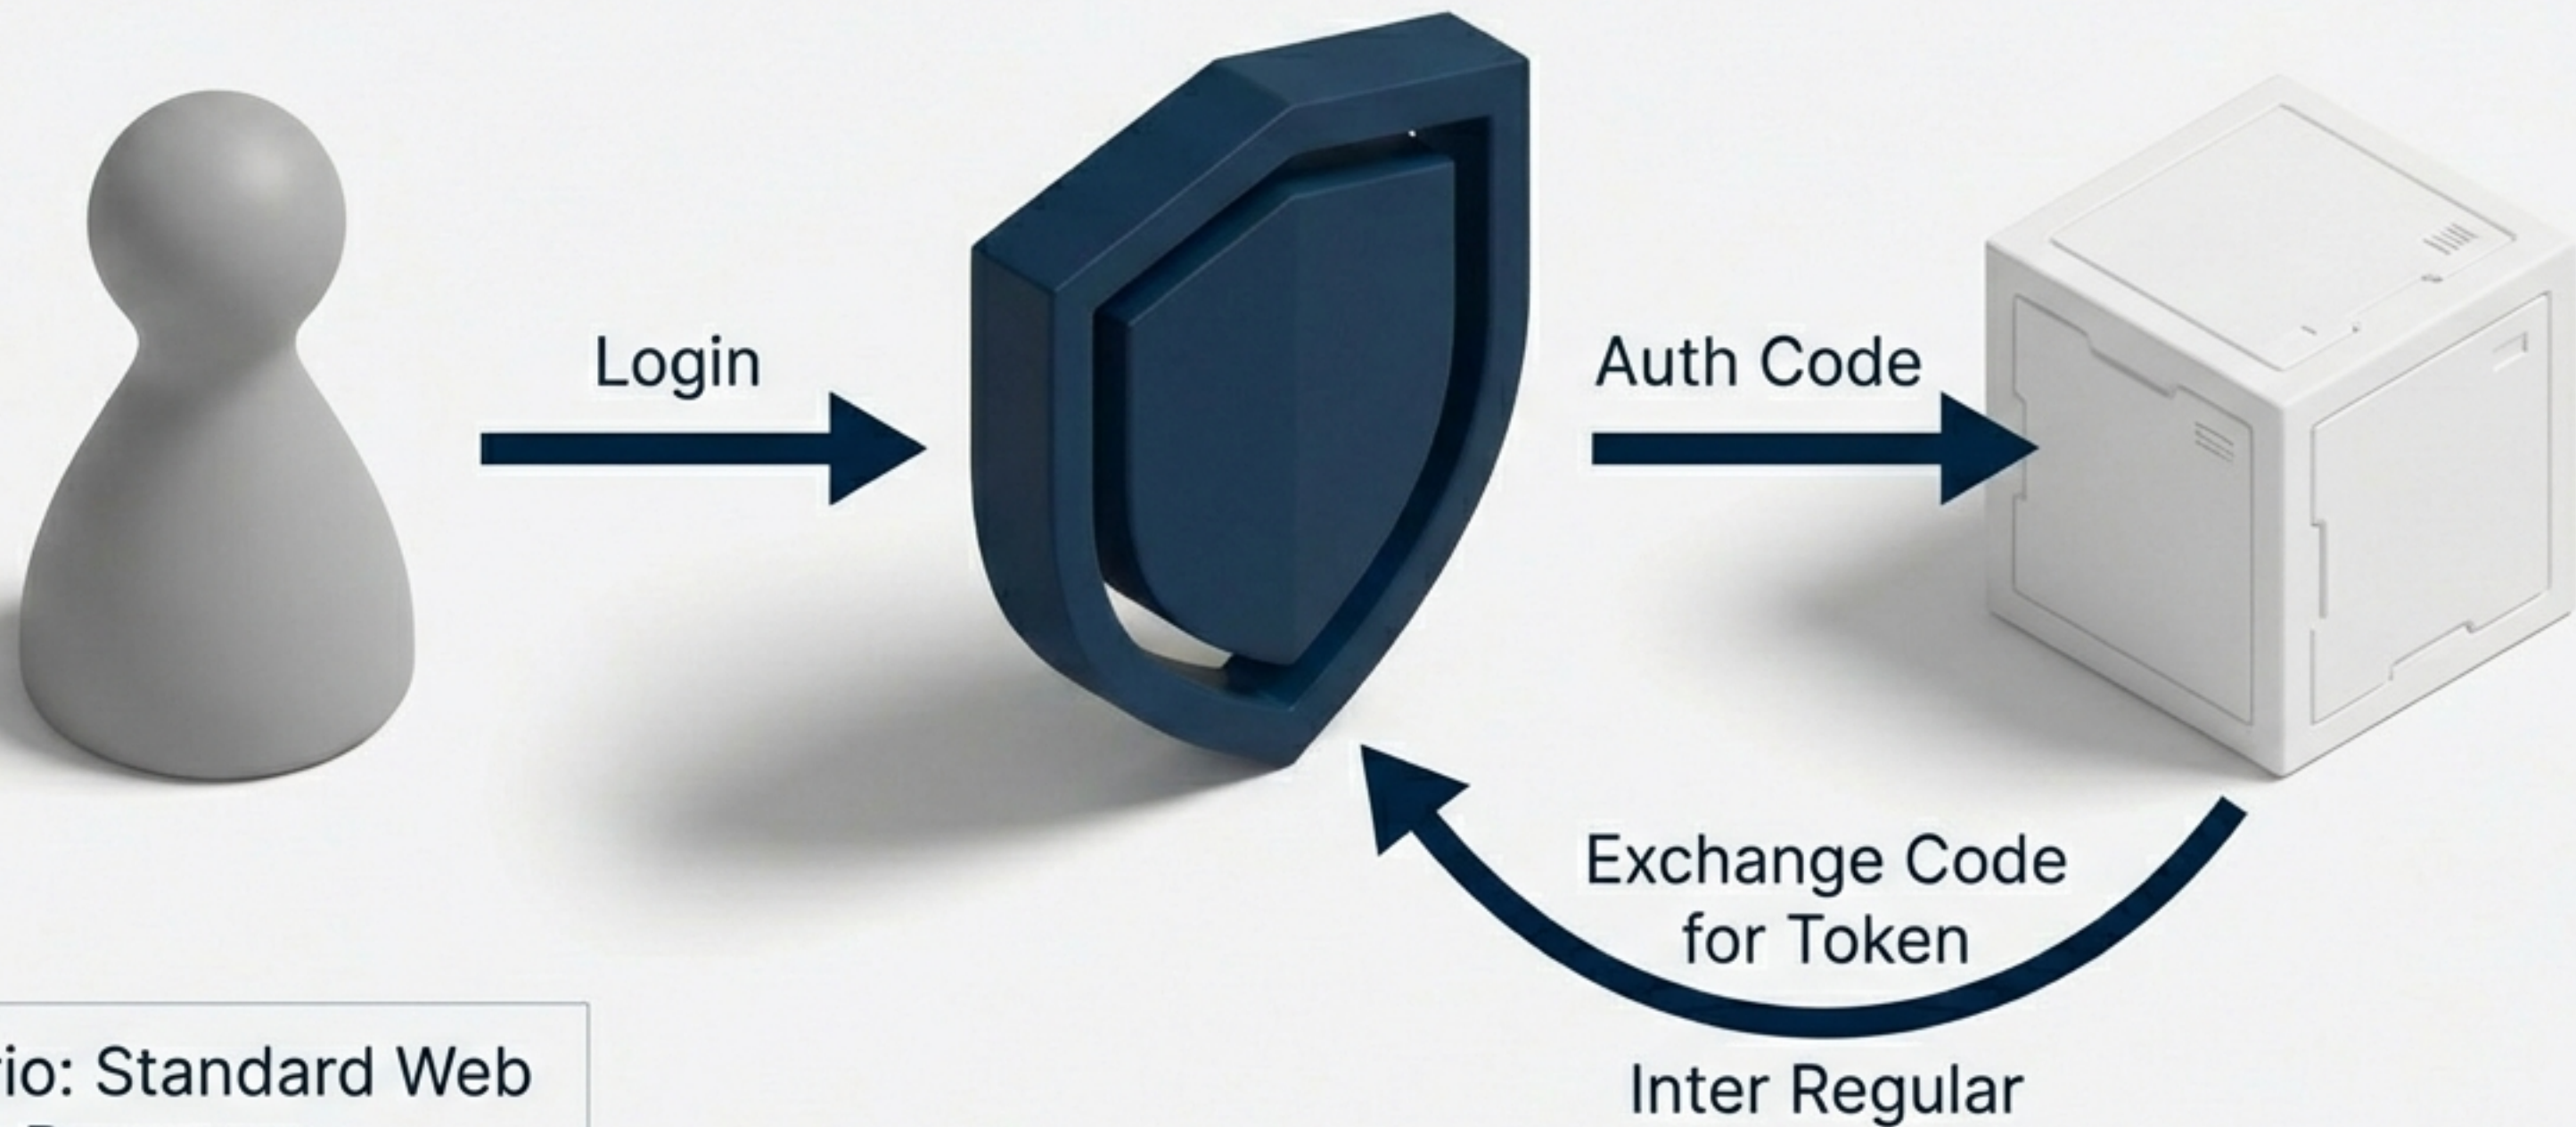

The Ticket

Proves Identity

Proves Permission

The Web Standard

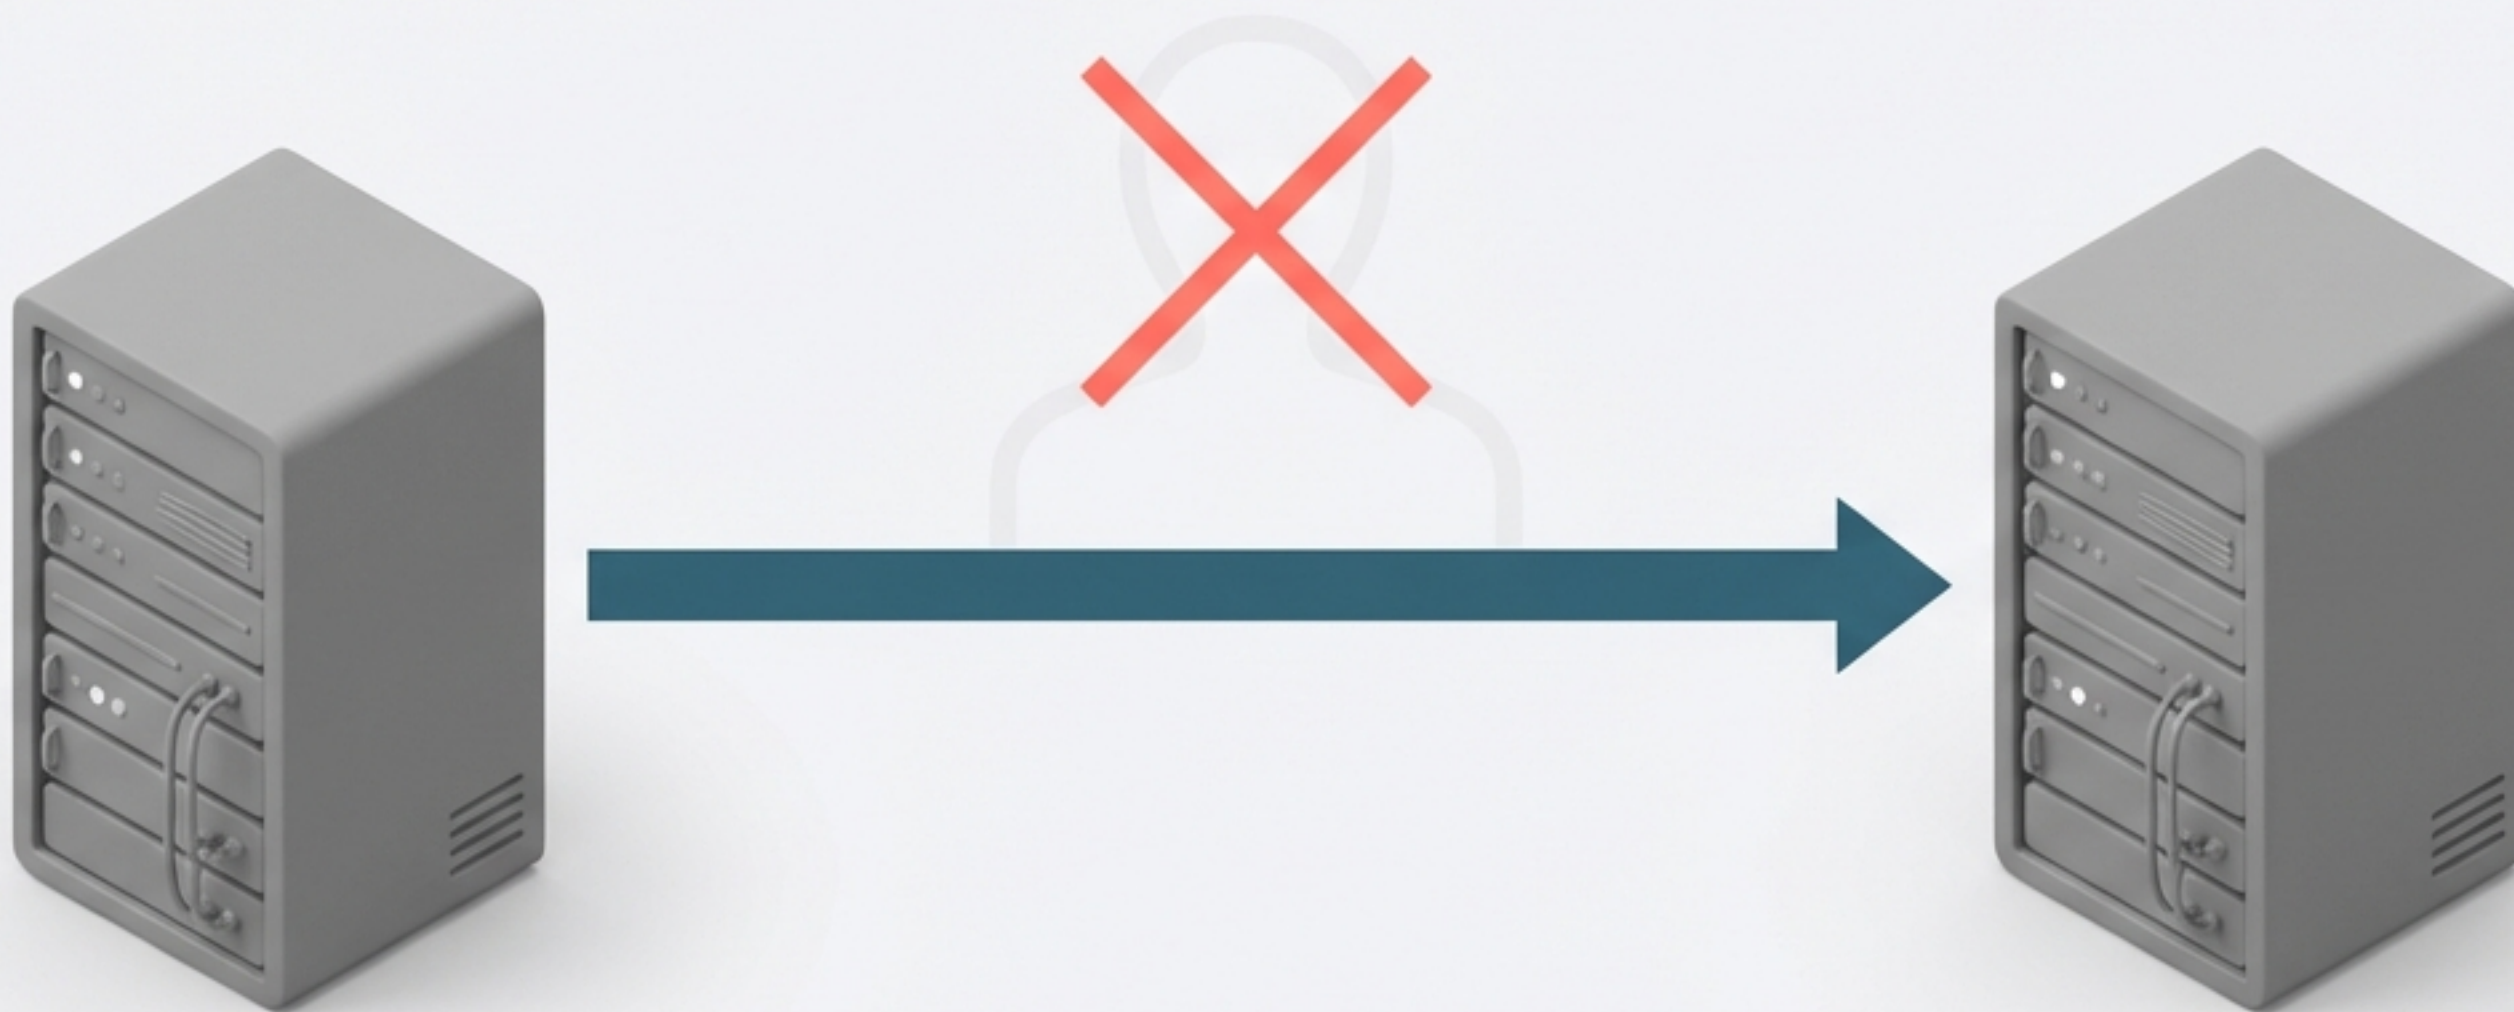

Authorization Code Flow

Scenario: Standard Web
Apps & Browsers

Machine to Machine

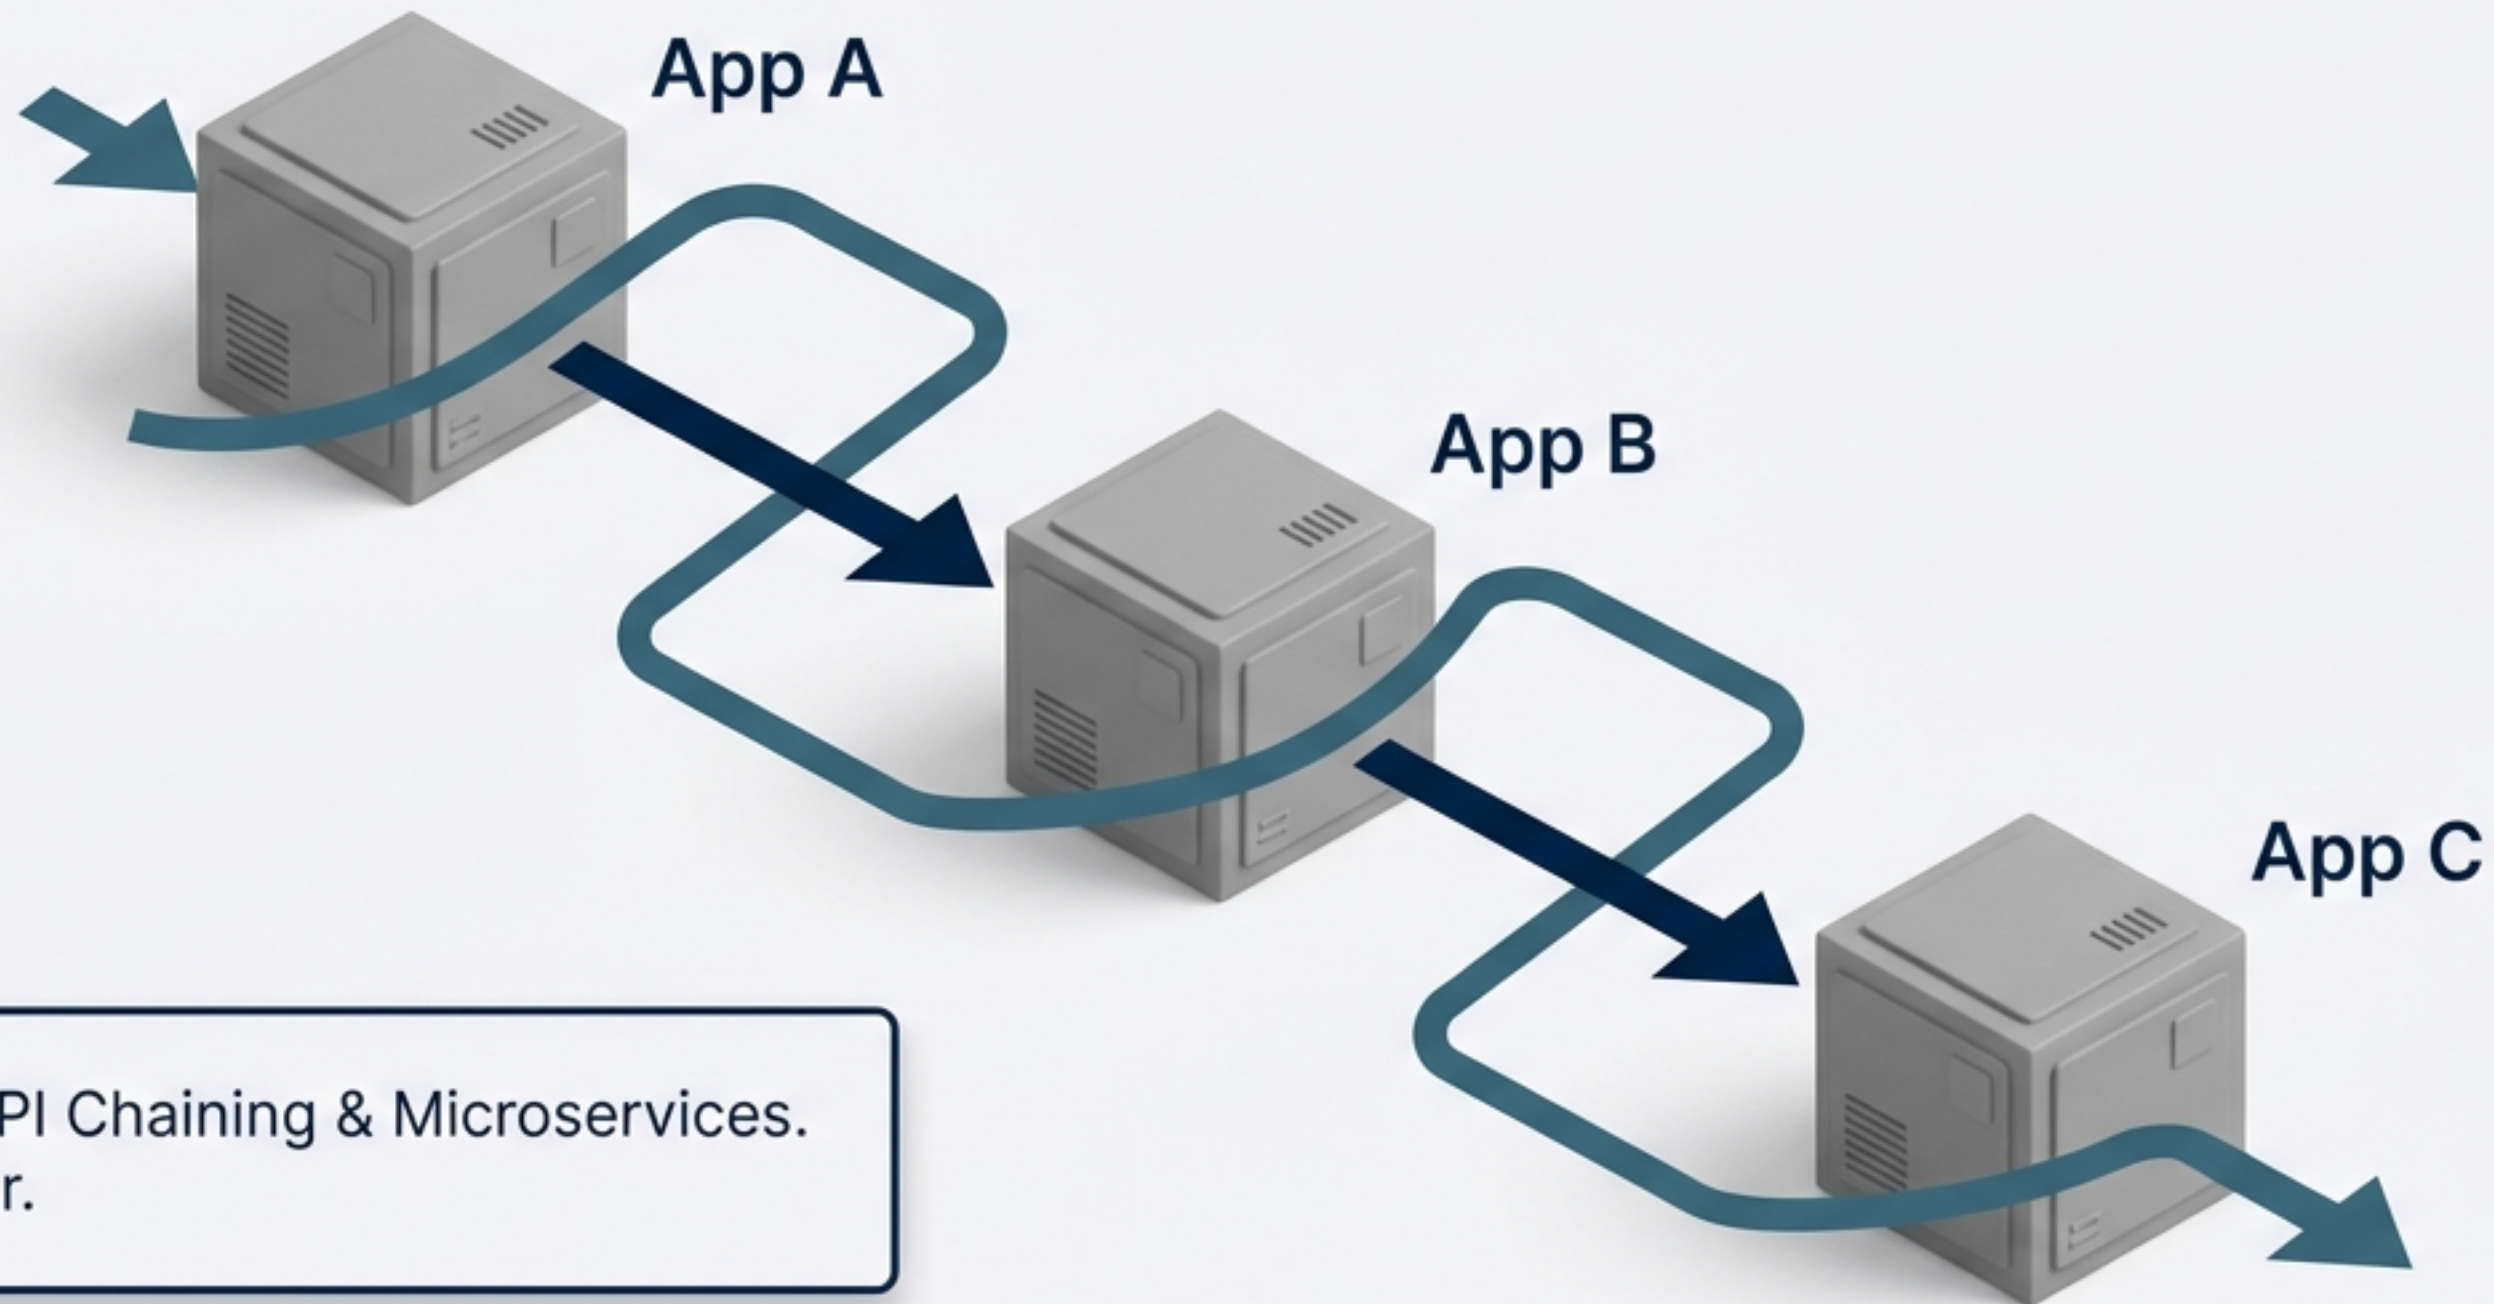

Client Credentials Flow

Scenario: Service-to-Service / Daemons.

The Chain of Trust

On-Behalf-Of (OBO) Flow

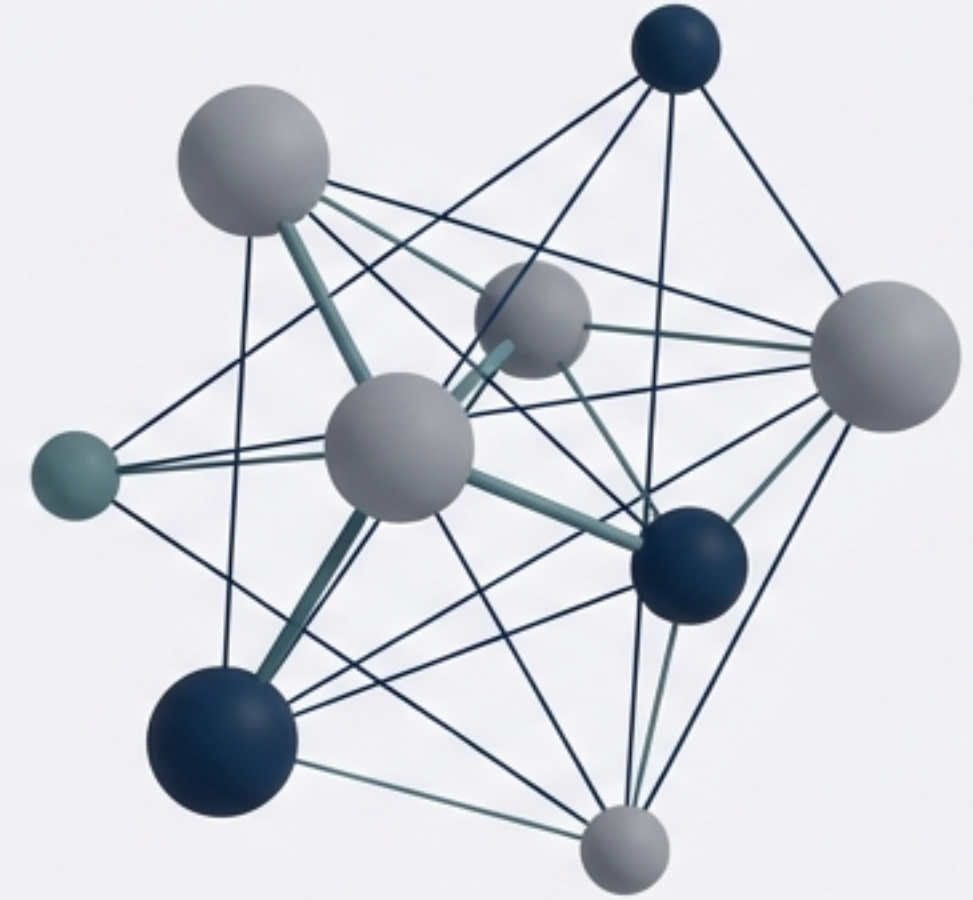

Scenario: API Chaining & Microservices.
Inter Regular.

Deployment Scenarios

Internal Workforce
Inter Regular

Microservice Architecture
